

COMP101  
Introduction to Programming  
2025-26  
Lecture-02  
Assessment

# COMP101 Assessment Strategy

- 100% coursework ('CA' – Coursework Assessment)
- No examination
- No team/group work
- All on individual effort – be careful of collusion
- Seven coursework assignments
  - Make a 'reasonable attempt' on all seven assignment
  - non-submission on an assignment registers zero
- Module fail: Resit exam in August of next calendar year

# COMP101 – Assessment Strategy

- Individual assignment weights:
  - Ass-01 = 12%                      sequence constructs
  - Ass-02 = 12%                      selection constructs
  - Ass-03 = 13%                      iteration constructs
  - Ass-04 = 13%                      validation control
  - Ass-05 = 16%                      functions (modularisation)
  - Ass-06 = 16%                      1-d array string handling
  - Ass-07 = 18%                      2-d array numeric handling
- Final (overall) grade is derived from all seven assignments
  - If you don't do well in one assignment, can improve your final grade by doing better in the next etc.

# COMP101 Assessment - What to do

- Attempt a submission at all seven assignments
- Assignments can have up to four elements
  1. Design (pseudocode)
  2. Code (Use Python IDLE to write maintainable, robust software)
  3. Testing (Use test tables to show program works for most sensible data)
  4. Documentation (in-line and self-documenting code)
- Some maths – no specialism
- Procedural constructs – there is no object orientation (O-O)

# COMP101 – How to pass an assignment

- Construct robust, maintainable programs
  - which satisfy requirements (the assignment specification)
- Make a ‘reasonable attempt’ if in trouble
  - Can be considered for solutions that may run into difficulty – don’t panic!
- Write, interpret (compile), execute procedural programs in Python
  - correct statements using clear code (keep it simple)
- Apply problem-solving techniques (Pseudocode)
- Apply testing in a structured manner
- Apply documentation – usually in-line commentary

# COMP101 Assignment Schedule

| Week Number<br>Commencing | Ass-01<br>12%                | Ass-02<br>12%                | Ass-03<br>13%                | Ass-04<br>13%                | Ass-05<br>16%                | Ass-06<br>16%                | Ass-07<br>18%                |
